-  hot beverages
-  snacks

---

IN ADDITION TO THEIR  
OUTSTANDING FEAT-  
URES, MANY OF OUR DE-  
VICES ALSO OFFER THE  
FOLLOWING BENEFITS:

SILEXA Net capable

customer  
experience product

self-serve option

Computer-controlled dispensing systems have existed since the 1970s. The first generation of such systems was developed to make beverage dispensing in the hospitality industry more efficient and to precisely control the dispensed amounts. In the early 1980s, computer-assisted systems were introduced, enabling multiple types of beverages to be managed and monitored from a central unit.

## **REDL AS A PIONEER OF TOUCH-SCREEN TECHNOLOGY IN DISPENSING SYSTEMS**

Since 1994, when we began manufacturing our dispensing systems, Redl has grown into a leading provider of innovative solutions in this field. As early as the late 1990s, we were pioneers in introducing touchscreens to dispensing systems, replacing traditional illuminated and blinking buttons with modern, user-friendly touch screens. This groundbreaking innovation ushered in a new era in beverage dispensing that continues to set industry standards today.

## MAXIMUM EFFICIENCY

Our state-of-the-art touchscreens, inspired by automotive technology, elevate the ease of use and clarity of our dispensing systems to a new level. These large-format displays show keg status and switching processes in real-time, significantly improving efficiency in busy hospitality environments.

## STYLISH DESIGN ELEMENTS

Modern dispensing systems are no longer just functional devices - they are also stylish design elements that can seamlessly integrate into the ambiance of any establishment. Materials like wood and molded components give our dispensing bars a sophisticated look, making them a standout feature at any bar.

## **INNOVATIVE BEER DISPENSING SYSTEMS FOR MAXIMUM POURING COMFORT**

Our beer dispensing systems represent outstanding quality and continuous innovation. At Redl, we are constantly evolving our systems to meet the growing demands of the market. We place special emphasis on ensuring that all essential components for a perfect pour are discreetly integrated into the system - from the state-of-the-art electronics to the tap cooling, which ensures that every glass of beer is optimally chilled and freshly poured.

## **UNINTERRUPTED POURING WITH INTELLIGENT TECHNOLOGY**

To avoid interruptions in pouring, we rely on the most advanced keg switching systems. These enable a seamless transition from an empty keg to the next without any loss of quality or delays. At the same time, our automatic cleaning systems ensure the highest hygiene standards with minimal effort - a must for long-term success in the hospitality industry.

# SELF-SERVICE SOLUTIONS FOR MODERN HOSPITALITY

In response to rising labor costs and staff shortages, we offer a wide range of self-service solutions. These systems allow guests to pour their own beverages in the exact amount they desire. Particularly in the U.S., we have established ourselves as a market leader in this area, setting global standards in terms of technology and user-friendliness.

# CUSTOM SOLUTIONS FOR INDIVIDUAL NEEDS

In addition to our extensive product range, we are happy to develop, build, and deliver customized solutions tailored perfectly to your specific requirements.

Redl offers innovative solutions for controlling wine and spirits, specifically designed for the needs of the hospitality industry. These systems ensure precise portioning, accurate billing, and optimized inventory management. With Redl's advanced dispensing technologies, restaurateurs maintain full control over beverage flow, reduce losses, and maximize profits.

## STYLISH PRESENTATION

There are various approaches and solutions for the efficient control and presentation of wine and spirits in hospitality. Especially in bars and clubs, the attractive display of products plays a significant role. For this, our Tap Rack is ideal, as it stylishly showcases your spirits while also simplifying the dispensing process.

*QStall, Krams*

## SPACE-SAVING EFFICIENCY

When space is limited or cocktails are frequently prepared, the Bottle Tap Flex offers the perfect solution. This compact and flexible system allows for the quick and efficient preparation of cocktails without taking up valuable bar space.

## PERFECT WINE DISPENSING

For restaurants and hotels where wine plays a central role, the Bottle Tap Fix is ideal. With specially designed pourers, this system is perfect for the precise and elegant dispensing of wines and spirits.

## SPIRITS AND MIXED LONGDRINKS CAN BE SERVED DIRECTLY FROM THE SILEXA DISPENSER

Another highlight is the ability to dispense the most commonly used spirits directly from the SILEXA dispenser. Aperol Spritz, Gin & Tonic, and other popular cocktails can be prepared at the push of a button, speeding up service and optimizing workflow.

Redl offers comprehensive solutions for professional use in coffee hospitality, maximizing both efficiency and control. With innovative products like the Coffee Box, we ensure that coffee servings are precisely monitored and billing is reliably tracked. It provides a detailed overview of sales by server, product, or category and ensures accurate control over pre-ordered items, boosting efficiency in any operation.

## **SELF-SERVICE SOLUTION WITH TELEMETRY**

The Coffee Terminal, on the other hand, is designed to transform an espresso machine into a full-fledged self-service solution. It supports a wide range of payment methods - from cash to credit and debit cards, RFID cards, QR codes, and barcodes. With telemetry connectivity, you always maintain real-time control over sales and error reports.

## **CUSTOM INTEGRATION OF ESPRESSO MACHINES**

In addition, Redl offers custom dispensing systems and cash register integrations for espresso machines and specialized solutions like milk and syrup dispensers, which can be seamlessly integrated into modern espresso machines.

## PRECISE MILK DOSING

Our SILEXA Multi Tap is perfectly designed to meet the needs of baristas and coffee lovers. It allows for hygienic and precise milk dosing directly from the cooler, ensuring consistently high quality and reliability, especially during busy peak times.

## AUTOMATIC SYRUP DOSING

The SILEXA Syrup Station offers the ability to integrate and automatically dose up to four different syrups, such as caramel or hazelnut, directly into the fully automated espresso machine.

Redl stands not only for innovative dispensing systems and accessories but also for customized solutions tailored precisely to the needs of our customers. With a team of dedicated software and hardware developers and engineers, we continuously invest in expanding our product range. Our goal is to keep evolving and, with great attention to detail, bring even the most unique customer ideas to life.

## **AUTOMATIC AND EFFICIENT**

An example of this is our indestructible SILEXA KEG Switcher, which automates keg changes without the need for a traditional FOB stop. Additionally, we've developed the SILEXA Draft Line Cleaner, a fully automated cleaning system that ensures impeccable hygiene for beverage lines. Our RFID waiter key, SILEXA ID, also offers an efficient solution to address many weaknesses found in existing systems.

# INNOVATIVE OEM SOLUTIONS

In addition to simple yet efficient control systems like the SILEXA One Tap and SILEXA Four Tap dispensing systems, we offer a wide range of specialized solutions. These include converters for linking various protocols and interfaces (like MDB, CSI/CCI, RS232, RS485, CAN), innovative electronics systems, and pump technology for refill stations in drugstores and supermarkets, as well as dispensing stations for eyeglass cleaner. This product diversity highlights our passion for innovation and our ability to successfully meet even the most complex customer demands.

## **DRAFT LINE CLEANER**

CLEANING DOESN'T HAVE TO BE COMPLICATED,  
JUST THOROUGH. THE PERFECT BEER ENJOY-  
MENT RELIES ON THE HYGIENE OF THE  
BEVERAGE LINES.

# THE CLEANING SERVICE FOR PURE BEER PLEASURE

Milk bacteria? Wild yeasts? Beer-damaging bacteria? These can quickly drive your guests away. On the other hand, beer drinkers appreciate it when their poured beer always tastes as fresh as they expect. Regular cleaning of the beer lines is essential for this. The Draft Line Cleaner takes care of it for you.

## SILEXA KEG SWITCHER

---

THE KEG SWITCHER ELIMINATES THE STRESS OF CHANGING KEGS, ENSURING A SEAMLESS AND UNINTERRUPTED BEER SUPPLY FOR YOUR DISPENSING SYSTEM.

# KEG CHANGE WITHOUT EFFORT, BEER NON-STOP

The fully automatic system seamlessly switches between empty and full kegs while keeping the lines foam-free, ensuring complete visibility and eliminating downtime. This saves valuable time, boosts your beer sales, and ensures efficient dispensing logistics, so you can focus on providing excellent service to your customers.

**KEEP AN EYE ON THE KEG STATUS WITH THE 2.8" TOUCHSCREEN**

**LOW MAINTENANCE AND HYGIENE-OPTIMIZED, SPONGE BALL CLEANING OPTION**

**FULLY AUTOMATIC SWITCHING, VENTING, AND FLUSHING PROCESSES**

# SILEXA CREATOR

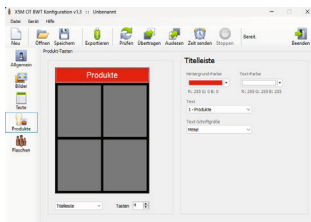

YOUR BEVERAGE DISPENSING SYSTEM  
PERFECTLY CONFIGURED, QUICKLY AND EASILY.

With SILEXA Creator, beverage dispensing systems can be easily configured. All parameters such as beverage settings, portion control, and cleaning can be individually customized - on-site or via remote access. Full control and quick optimization of your processes.

## SILEXA X3M / X5M CONFIG-TOOLS

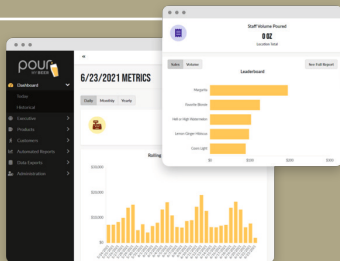

Our configuration software enables easy setup and management of stand-alone dispensing devices with flexible settings, line setup, and precise accounting overview.

# POURMYBEER WEBSERVER

The software streamlines operations and provides detailed reporting, RFID-card-, product-, and keg management.

The PourMyBeer Webserver offers the following features, among others:

**RFID-CARD SYSTEM: MANAGE ADMIN, MANAGER, STAFF, AND CUSTOMER CARDS**

**PRODUCT DATABASE: ADD NEW BEVERAGES AND ADJUST PORTION SIZES**

**POURMYBEER SCREEN SETUP: CUSTOMIZE FUNCTIONS AND LAYOUTS**

**REPORTING: DETAILED SALES REPORTS FOR PERFORMANCE ANALYSIS**

**KEG MANAGEMENT: MONITOR KEG LEVELS WITH AUTOMATIC NOTIFICATIONS**

In 2014, we began working with Josh Goodman, CEO of PourMyBeer, to develop innovative self-pour systems that have revolutionized beverage sales in the hospitality industry. Since then, we have continued to produce the core of this system. Our technology enables customers to pour their own drinks, which not only boosts efficiency but also maximizes sales in bars, restaurants, and hotels around the world. Today, with over 12,000 taps installed, PourMyBeer is a global leader in self-serve technology.

*PourMyBeer @ The Craftcade, USA*

# THE SELF-SERVE REVOLUTION

The self-pour concept from PourMyBeer has expanded far beyond taprooms. While customers still enjoy sampling different beverages in taprooms, self-service has become increasingly important due to rising labor costs and staffing shortages. In hotels, guests can pour their drinks using their room card, and at stadiums or events, visitors can avoid long lines by refilling their own drinks. This flexible system ensures quick, seamless service and significantly boosts efficiency for operators, making it a powerful tool for increasing profitability.

## POURMYBEER FOR EVENTS

---

SELF-SERVE SOLUTIONS FOR STADIUMS AND EVENTS SELL THE BEERS VISITORS WOULDN'T QUEUE FOR. THEY'LL LOVE IT AND NEVER MISS A MOMENT OF THE GAME OR CONCERT.

# YOU CAN'T PAUSE THE GAME BUT YOU CAN FAST FORWARD YOUR QUEUING

It allows your visitors to be their own barkeeper: They can purchase an RFID-card, use it to buy a (reusable) cup and pour their own beer at the PourMyBeer System. At the end of the game the cup can be returned and the deposit is loaded on the RFID-card. A system that has proven to reduce wait times for the visitor and boost sales and reduce workload for the venue.

---

**SELF-POUR TAPS: CUSTOMERS SERVE THEIR OWN DRINKS, REDUCING WAIT TIMES**

**REUSABLE CUPS: PROMOTES WASTE REDUCTION THROUGH REUSABLE CUPS**

**INCREASED SALES: BEER SALES CAN RISE BY UP TO 25% DUE TO SHORTER WAIT TIMES**

**COST SAVINGS: REDUCED STAFFING NEEDS AS CUSTOMERS POUR THEIR OWN DRINKS**

**FAST SERVICE: EFFICIENTLY SERVES LARGE CROWDS, IDEAL FOR STADIUMS AND EVENTS**

---

# POURMYBEV FOR CANTEENS

---

CAFETERIA MANAGEMENT REDEFINED:  
SIMPLE PAYMENTS AND SELF-SERVICE  
WITH RFID CARDS AND SMART TECHNOLOGY!

# EASILY RECHARGE, PAY CONTACTLESS, ENJOY SMART

With a user-friendly charging terminal, employees can easily recharge their RFID payment cards, wristbands, or key fobs—whether via coin insertion, banknotes, credit cards, or even Apple Pay. The recharged cards enable quick payments at self-service devices such as espresso machines, vending machines, or beverage dispensers. Additionally, the system can be seamlessly integrated with cash register systems, access control systems to enhance operational efficiency.

---

**USE ESPRESSO MACHINES, VENDING MACHINES, AND BEVERAGE DISPENSERS**

**DEPENDING ON CONFIGURATION: COINS, BANKNOTES, CREDIT CARDS, AND APPLE PAY**

**INTEGRATION WITH ACCESS CONTROL SYSTEMS AND CASH REGISTER SYSTEMS POSSIBLE**

**EASY CHARGING TERMINAL - PERFECT FOR SMOOTH CANTEEN OPERATIONS**

**EASY MANAGEMENT VIA WEB BROWSER**

30 YEARS OF EXPERIENCE

---

MADE IN AUSTRIA 

## VERSATILE SOLUTIONS FOR EVERY INDUSTRY

Our products are incredibly versatile and flexible, making them suitable for nearly any industry. Whether it's hospitality, retail, large events, or even private use, our solutions are tailored to meet your individual needs. They seamlessly integrate into various business processes, from cash register systems to complex administrative tasks, ensuring that everything runs smoothly. Especially in dynamic environments like restaurants, clubs, hotels, and events, our systems deliver unmatched efficiency, user-friendliness, and long-term reliability. Wherever you are, our products are the ideal choice for optimizing operations and improving customer satisfaction.

## TAILORED SYSTEMS FOR SPECIAL CHALLENGES

Thanks to our innovation, versatility, and sense of adventure - and not least due to the reliability and durability of our systems - we also offer customized solutions for unique and challenging environments. These solutions guarantee both efficiency and ease of use, making complex tasks simpler. Our products ensure we are ready to tackle any challenge, no matter how extraordinary the location, environment, or task may be, and provide reliable solutions that stand the test of time.

We had the privilege of working on a project for refill stations in drugstores, where we developed the electronics. These innovative and sustainable refill systems give customers the opportunity to refill products in an eco-friendly way, actively contributing to the reduction of packaging waste.
