POURMYBEV - THE IDEAL SOLUTION FOR CANTEENS AND COMPANY HOSPITALITY

PourMyBev for Canteens offers a comprehensive and user-friendly system tailored to canteens, simplifying the payment process for employees and enhancing operational efficiency. With an intuitive **charging terminal ①**, employees can easily recharge their RFID payment cards, wristbands, or key fobs using various methods, including coins, banknotes, credit cards, or Apple Pay. This flexibility ensures smooth recharging, allowing employees to make quick, contactless payments at self-service stations.

SEAMLESS INTEGRATION FOR ENHANCED OPERATIONS

Once recharged, the payment cards can be used for purchases at espresso machines, **vending machines ⑤**, **SILEXA Dispenser ③**, and **SILEXA Tower ④**. The system also offers seamless integration with **cash register systems ②**, enabling effortless billing and management of transactions. Additionally, integration with access control systems

helps further optimize the flow of operations in busy canteen environments. The easy-to-manage web-based interface allows administrators to oversee the entire system efficiently, making it an ideal solution for modern, fast-paced canteen settings.

For the company, **PourMyBev** enhances operational efficiency by streamlining the payment process and reducing staff workload through self-service stations. For employees, it offers convenience with quick, contactless payments and easy recharging of RFID cards, allowing them to access a wide range of services effortlessly during their breaks. This combination improves both productivity and user satisfaction.

EFFICIENT BEVERAGE SOLUTION FOR KITCHENETTES AND MEETING ROOMS

The **SILEXA Tower Combo** offers a practical beverage solution for your customers and staff. From a single compact column, both still and sparkling magnesium-mineralized water, as well as two different flavors, can be dispensed. Its space-saving design and 2.8" touchscreen make operation particularly convenient and flexible.

COMBINING SUSTAINABILITY AND CONVENIENCE

Freshly tapped carafes replace the need for bottles, eliminating the hassle of carrying and chilling mineral water. At the same time, the system helps reduce the carbon footprint, provides a diverse range of beverages, and allows easy self-service during breaks.
