YOUR DAILY OPERATIONS AND IMPROVE
EFFICIENCY. FIND THE IDEAL SOLUTION
TAILORED TO YOUR NEEDS.

ENHANCING CRUISE SHIP EFFICIENCY WITH INNOVATIVE BEVERAGE SOLUTIONS

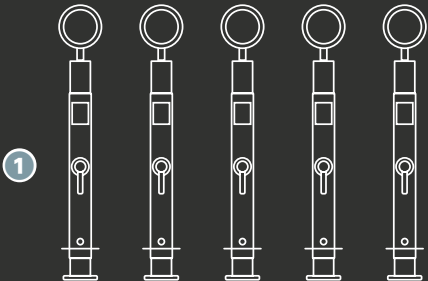

Our solutions for cruise ships are designed to enhance efficiency, improve guest experience, and ensure seamless operations. With automated systems for beverage dispensing, self-service solutions, and innovative cocktail machines, our technology simplifies operations while maintaining the highest standards of quality and hygiene. From bars to buffets, our systems integrate smoothly, reducing staff workload and providing guests with convenient, top-tier service throughout their journey. Our extensive experience on cruise ships has enabled us to continuously refine our products and tailor them even more effectively to the specific demands of the industry.

Our extensive experience on cruise ships has allowed us to continuously develop our products and tailor them even more precisely to the specific needs of the industry.

THE ALL-IN-ONE SOLUTION FOR BREAKFAST BUFFETS

We offer space-saving breakfast buffet solutions that enable efficient use of available space while meeting the demands of fast and hygienic self-service. The **SILEXA Slim Tower Vario 1** is the ideal solution for breakfast buffets on cruise ships. This elegant all-in-one tap column allows for touchless dispensing of various beverages such as coffee, juices, milk, and water from individual taps. It replaces multiple bulky dispensers on the buffet counter, freeing up valuable space. An intelligent glass sensor and hand sensor ensure spill-free dispensing and protect guests from burns, guaranteeing maximum safety and a clean buffet operation.

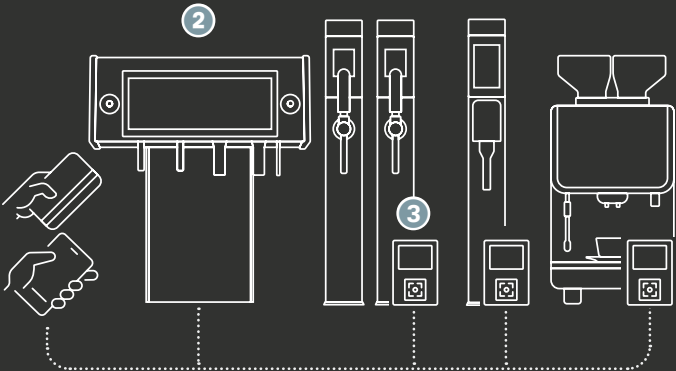

USER-FRIENDLY SELF-SERVICE FOR BUFFETS

With **PourMyBeer** and **PourMyBev systems**, combined with the **SILEXA Dispenser ②** and **SILEXA Towers ③**, we offer flexible solutions for self-service areas on cruise ships. These systems allow guests to easily pour drinks like beer, wine, soft drinks, and coffee using their room card or resort app. For operators, these systems boost efficiency, reduce costs, and increase revenue by lowering staffing needs while allowing guests to serve themselves at any time. Guests benefit from shorter wait times, greater convenience, and the freedom to select their drinks independently and easily.

INTEGRATED DISPENSING SYSTEMS FOR BARTENDER OPERATION WITH CASH REGISTER CONNECTIVITY

In addition to self-service solutions, cruise ships also feature dispensing systems operated by bartenders, which can be activated through **connected cash register systems**. This ensures a smooth and controlled beverage dispensing process. Furthermore, coffee machines can be seamlessly integrated into the system for both staff-operated and self-service modes, maximizing service and flexibility on board.

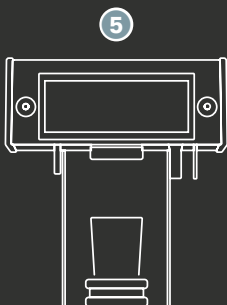

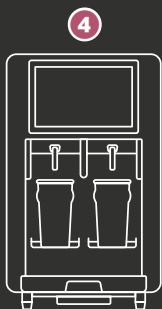

EZ2POUR - SIMPLE BEER DISPENSING FOR GUESTS

The **SILEXA EZ2Pour Self-Serve 4** system is designed for easy and fast beer dispensing. Even inexperienced guests can intuitively operate the system. Billing is automatically processed through the room account, and with integrated age verification, it ensures that alcoholic beverages are only served to authorized individuals.

EFFICIENT AND HYGIENIC COCKTAIL PREPARATION ON CRUISE SHIPS

The **SILEXA Dispenser Cocktail 5** offers numerous benefits for cruise ships. At the push of a button, the machine mixes perfect cocktails using up to 24 ingredients – quickly, consistently, and without the need for trained bar staff. Thanks to precise dosing and an innovative hygiene concept, waste is minimized, and every drink tastes consistently excellent. A patented cleaning program automatically ensures clean lines and meets the highest hygiene standards with USPH certification.
